HISTORIC AMERICAN ENGINEERING RECORD

AL-2

Union Station

HAER  
ALA  
51-MONG.  
24-

Date: 1898

Location: Water Street, Montgomery, Alabama

Designed by: Benjamin Bosworth Smith

Owner: City of Montgomery

Significance: Montgomery's Union Station is an impressive Romanesque structure, and an excellent example of late 19th century commercial architecture. Its size, the ambitionsness of its design, and its opulence of material make the station an impressive monument to turn-of-the-century rail transport.
